Proposal

Organization overview:

- Name: Timeless Edge

Timeless Edge was founded in 2020 by a 15-year-old Ntokozo Ngcobo. He was inspired by the fashion sense on the streets of his township of SOWETO.

Mission:

Our mission is simple: to design clothing that speaks for people, by the people.

We are driven by the belief that true streetwear was born from originality. Every design is our own creation: - crafted in South Africa, following the rules of our streets, and made to stand tall on the global stage. By blending local energy with bold innovation, we're not just following trends, we're setting them. Taking the rhythm of our culture and sharing it with the world

Vision:

Timeless Edge envisions becoming a leading lifestyle brand that inspires confidence and individuality through fashion. Our goal is to create clothing and accessories that blend quality, comfort, and style — from summer wear to winter collections, hoodies to tracksuits, and caps to backpacks. We strive to be recognized not just for our products, but for shaping a culture where every person feels empowered to express their unique edge.

Web goals and objectives:

The primary goal of the Timeless Edge website is to establish a strong online presence that reflects the brand's identity and drives engagement. The site will serve as a digital storefront and communication hub for customers seeking high-quality clothing, including summer wear, hoodies, t-shirts, shirts, sweatpants, tracksuits, winter apparel, caps, and backpacks.

Proposed website features:

We will add a navigation bar that will have home page, about us, contact us, gallery and services buttons that will provide all the information about us

Timeline:

The project will take 3 to 7 weeks to complete

Design and user experience:

The design of the Timeless Edge website focuses on simplicity, clarity, and accessibility

—reflecting the brand's modern yet beginner-friendly aesthetic. The layout is structured to make navigation intuitive while showcasing products like high-quality clothes, hoodies, t-shirts, sweatpants, tracksuits, caps, and backpacks in a clean gallery format.

Budget:

To cover transportation, research, energy and payments; this project will cost R3000 to R3500
